

1979 LUNAR DIRECTORY
1979 LUNAR DIRECTORY

THIS EDITION PROVIDED BY THE CENTRAL STATES VHF SOCIETY

8/01/79

Introduction

The object of this directory is to provide a complete and organized document that contains all the stations currently using EME (Earth-Moon-Earth) communications, those that have been operational, and those that are very near completion.

This directory will also assist you in locating stations that are active on the VHF and UHF frequencies. The stations listed are candidates for the following activities:

- * EME SCHEDULES
- * TROPO SCHEDULES
- * AURORA SCHEDULES
- * SPORATIC E CONTACTS
- * METEOR SCHEDULES
- * TRANSEQUATORIAL SCHEDULES
- * GROUND WAVE SCHEDULES

It is hoped that this document is used not only by active EME'ers but also for newcomers to locate the name and address of a nearby person for direction, guidance, and experience to get started in moonbounce. This is the first edition and therefore is not 100 percent correct. Your updates are needed to make this document worthwhile and useful in the future. A form has been provided at the rear of the book to simplify updates.

The information is arranged alphabetically by state and country, then by the frequency used, and finally by the call letters of each station.

The Central States VHF Society has paid the printing costs involved and availability is limited by the number printed.

Distribution of this directory is for the sole purpose of promoting VHF and UHF activity and is intended to provide a service to interested amateurs that seek stations attempting similar propagation communications.
